
FOR IMMEDIATE RELEASE 28th January 2010

Ebis accredited by Solicitors Regulation Authority

ebis, the specialist in investigations and digital forensics, today announced that it has been approved by the Solicitors Regulation Authority (SRA), the independent regulatory body of the Law Society of England and Wales, to provide training courses accredited for continuing professional development for solicitors.

The training will give solicitors an understanding of how digital evidence impacts upon cases ranging from establishing liability in complex disputes and employee fraud, through to corporate investigations.

Gary Austin, a partner at London law firm Barker Austin, attended a pilot seminar held in September and commented: "A thought provoking course delivered by excellent speakers whose specialist knowledge is evident and infectious. It is a good basis for getting to grips with digital evidence and its practical applications."

Catherine Bunton, Managing Director of ebis, commented, "Advances in technology make digital forensics and e-disclosure a fast moving – and for many solicitors – a daunting area. Our training will give solicitors a practical and straightforward overview so they know when digital evidence may be relevant to a case and the right questions to ask."

The first SRA accredited course delivered by ebis, entitled, "Information NOT Technology - Getting the Best from Digital Evidence and e-Disclosure" was extremely well received by delegates and building on this success will be run again in Central London on 18 February 2010.

This seminar provides an introduction into the disclosure process and presenting digital evidence. It also gives valuable insight into suitable approaches to computer system investigations, forensic data analysis techniques and preservation of evidence.
